Art Unit: 2616

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by HAN in U.S.

Patent No. 6,333,927.

Regarding claims 1-8, HAN discloses a method for formatting voice data comprising: processing packet data received from a base transceiver station (BTS) (col. 1, lines 47-53); expanding the processed packet data using a fixed code rate rule (col. 2, lines 50-52); and transmitting the expanded packet data with framing information to a mobile switching center (MSC) (col. 3, lines 3-10).

3. Claims 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 13-18 are allowed.

5. Applicant's arguments filed July 27, 2006 have been fully considered but they are not persuasive.

In the remark, the applicant mainly argued that HAN reference merely discloses the receiving and analyzing of a frame and transmitting the analyzed voice or data to a vocoder for transmission to MSC, which is conventional data transmission method between BTS and BSC

Art Unit: 2616

using fixed rate non-channelized HDLC scheme, which does not disclose the expanding of processed voice packet using fixed code rate rule as claimed.

The examiner disagrees since the analyzed voice or data transmitted to a vocoder for transmission to MSC does involve the processing and expansion of the voice or data packet, and it is the examiner's own interpretation of fixed rate non-channelized HDLC scheme as the claimed fixed code rate rule since there is no further limitation defining as to what a fixed code rate rule should be.

In view of the above reasoning, the examiner believes that the rejection of claims 1-8 under 35 U.S.C. 102(e) should be sustained.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Berry is cited to show the feature of data packet processing and analysis using fixed code rate rule known in the art similar to the claimed invention.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2616

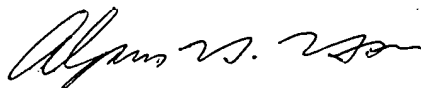

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
